Art Unit: 2816

1. This application contains claims directed to the following patentably distinct species of the claimed invention: species A, corresponding to Fig. 1A (reading on claims 1-9); species B, corresponding to the unillustrated embodiment where the first amplifier stage includes FETs 188, 190 and the second amplifier stage is coupled to terminals 174, 176 either with or without switch 186 (reading on claims 10-17 and 29-34); species C, corresponding to Fig. 1C (reading on claims 18-23); and species D, corresponding to Fig. 3 (reading on claims 24-28).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is seen to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 2816

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. The above-noted election of species requirement is necessary in view of applicant's remarks concerning how the present claims read on the corresponding drawing figures, and in view of the fact that the above-noted species A-D are all seen to be patentably distinct from each other.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth B. Wells whose telephone number is 703-308-4809. The examiner can
